

# The 4D Advantage

Base

Monitor

4D Difference

- *Track Fluids with Time*
- *Improved Production Forecasts*
- *Mapping of Pressure and Saturation*

- *Proprietary Algorithms and QC*
- *Fast Track Capabilities*
- *Integration with HFI™*
- *Rock Physics Evaluation*

Displays courtesy of Shell Exploration and Production

# Seismic Effect on the Reservoir Simulations

*Timelapse3D Processing improves your reservoir characterization to allow reduced risk and uncertainty on production forecasts*
